Section

VV17 - Should be installed on SW & NE area of vastu boundary.

VV17 - 3' x 3' x 3' deep pit size

VV17 can help in creating earthing for plots and projects which has new Earth fillings & true Earth connections are lost. It deviates and absorbs the negativity in the domain of 40' diameter range from centre of the base.

It is placed inside a 3' x 3' x 3' pit inside the Earth where Geopathic stress is found.

Inside the pit, some quartz crystals are dispersed with Agnihotra ash in the pit along with cow dung, lime water with camphor and then a layer of clean soil in this.
