

THE PROCESS INVOLVES  
PHYSICS IN BIOLOGY  
AND BIOLOGY IN PHYSICS

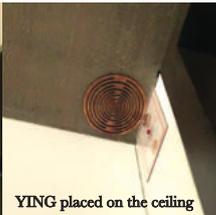

YING

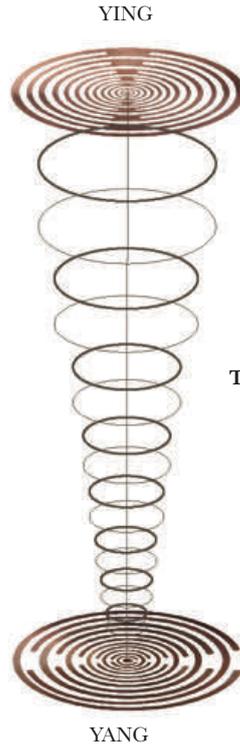

YANG

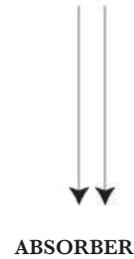

YANG placed on the floor

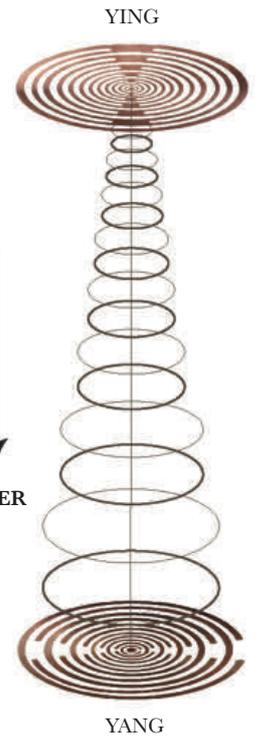

YING placed on the ceiling

TRANSMITTER

ABSORBER

YANG

**Ying Yang Relationship Harmoniser (YYRH) is based on principles of multi-wave oscillation (MWO).**

Two oscillation circuits producing short hertzian waves and produces heat which virtually connects both these oscillators where **one is transmitter and another is absorber.**

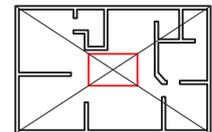

The waves thus generated has **high frequency electromagnetic property** which produces healing vibrations in resonance with concerned human energetics. These waves between two oscillators has strength to influence the neighbouring energy fields of the environment and people within this environment.

## FUNDAMENTAL PRINCIPLE

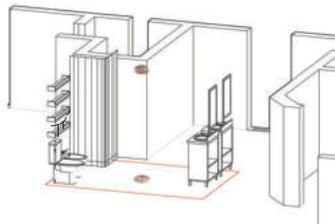

The fundamental principle of this scientific system may be summed up in axiom *“every living beings emit radiation and has capacity to get influenced by high frequency electromagnetic radiations.”*

## FUNCTIONS AND PROPERTIES OF YYRH

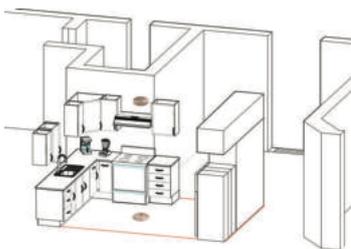

- YYRH behaves in both ying being absorber and yang being transmitter and visa-a-versa.
- Ying (feminine energies) negative charged vibration naturally act as an absorber.
- Yang (male energies) positively charged vibrations naturally act as a transmitter.

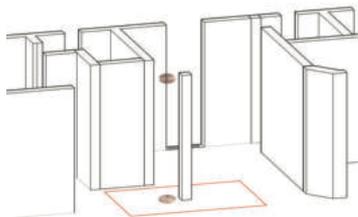

YYRH placed for the remedification of the incorrect placement of the bathroom inside the Bhramasthan

YYRH placed for the remedification of the incorrect placement of the kitchen inside the Bhramasthan

YYRH placed for the remedification of the incorrect placement of the column inside the Bhramasthan

YYRH placed for the remedification of the anti-clockwise staircase inside the Bhramasthan
